Reinsurance

Lecture (6 or 3 ECTS, see details below)

Important Updates COVID-19

Please visit [LSF](#) for ongoing updates regarding the offering and format of this course in SS2020!

Main Information

Lecturer & Support: **Dr. Peter Liebwein** (Lecturer)

Tobias Huber (Contact)

E-Mail: t.huber@bwl.lmu.de

Time & Location: (see below - „Tentative Schedule“)

Credits: 6 ECTS for **BWL PStO 2018**

3 ECTS for **BWL PStO 2015 and non-BWL students**

Exam: **Information on the examination will be provided via email.**

Registration via the LSF-Portal is mandatory.

Group of participants:

Please note that this lecture is open for Master of Science students (Betriebswirtschaftslehre, Finanz- und Versicherungsmathematik, Mathematik, Statistik).

Prior knowledge of risk management and insurance courses (e.g. risk and insurance, insurance economics, project course, or actuarial courses) is helpful as this course is regarded as an advanced level class.

Registration

The number of participants is limited. To apply for this course, please register **no later than April, 15th 2020**. The list of participants will be announced no later than April 20th, 2020.

Course Description & Main Objectives

The lecture provides an overview on insurance companies' risk management with a specific focus on reinsurance. Here, reinsurance will be derived as an option to mitigate insurance risks. In context of reinsurance, proportional and non-proportional types of reinsurance will be studied accordingly; some typical evaluation approaches, i.e. pricing approaches, will be analysed for respective types of treaties. Finally, a brief overview on alternative risk transfer instruments such as insurance linked securities (ILS) will be presented.

Tentative Schedule

The lecture is tightly blocked in the middle of the summer semester, which requires students to be highly disciplined in terms of regular attendance, active participation, and punctuality.
